Final-year B.Tech student at IIT Madras specialising in business analytics, data science, & ML-driven insights. Strong in Python, SQL, and Tableau with hands-on work across forecasting, automation, and business strategy.

EDUCATION

Indian Institute of Technology, Madras
Bachelor of Technology in Chemical Engineering

Chennai, India
Nov. 2022 – May 2026

EXPERIENCE

Supply Chain Analyst Intern

May 2025 – July 2025

ChampionX

Chennai, India

- Developed a Python-based simulation tool to auto-process **SAP data** and **calculate dynamic lead times**
- Built a Python algorithm using **NetworkX(MultiDiGraph)** to automate impact analysis of lead time variables
- Successfully reduced manual effort by **80%** through automation of complex lead time calculations & the workflows

Web Development Intern

Jan 2025 – Mar 2025

onlinemandi

Chennai, India

- Built a digital marketplace connecting farmers & buyers, improved agricultural supply-chain access & transparency
- Developed responsive, cross-browser UI with clean client-side logic using HTML, CSS, and JavaScript.
- Implemented real-time bidding & OTP authentication, onboarding 600+ users & driving early revenue generation

Business Analyst Intern

Nov 2024 – Dec 2024

Maviinci

Bengaluru, India

- Analyzed competitors and pricing trends to drive blazer sales growth
- Strategically targeted institutes before placement seasons, resulting in **Rs. 28 lakhs+ in sales** from IITM & VIT
- Designed a refund-based conversion policy achieving 85% conversion rate; built a Tableau dashboard tracking KPIs

PROJECTS

Indian Stock Market Bubble Prediction | *Python, Scikit-learn, LPP, Pandas*

- Built a predictive model to forecast stock market bubbles using historical bubble cases from 1700–2021
- Identified 7 leading indicators of bubble formation after statistically analysing 40+ global research papers.
- Implemented a robust ML model using LPP achieving 87% accuracy for portfolio risk management

Electricity Price Forecasting Pipeline | *Python, Pandas, XGBoost, OpenAI API*

- Built a modular pipeline processing 8,000+ hourly records with automated ingestion, QA checks, and 20+ features
- Improved forecasting accuracy by 30% over baseline using XGBoost with time-series validation
- Designed trading signals and integrated OpenAI API to auto-generate insights, reducing manual effort by 70%

Visual Question Answering | *Python, PyTorch, Hugging Face BLIP*

- Built a VQA system that answers natural language questions about images, demonstrating multimodal reasoning
- Implemented using Hugging Face BLIP-VQA, PyTorch and Python to integrate Computer Vision and NLP models
- Built a scalable prototype with dataset fine-tuning, web deployment, and extensibility to broader AI applications

ACHIEVEMENTS

- Secured **3rd** place in Shaastra Biz Quiz, Shaastra IIT Madras
- Quarter Finalists** in Indian Innovation challenge 2019 by IIM Bangalore
- Top 10** scorer in Business Minds, National level quiz competition (DIMS)

TECHNICAL SKILLS

Languages: Python, C, SQL (MySQL), JavaScript, HTML/CSS

Frameworks & Libraries: React.js, Node.js, MongoDB, Pandas, NumPy, XGBoost, Bootstrap, TailwindCSS

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, Postman, OpenAI API

Deployment & Design: PowerBI, Tableau, Figma, Canva, Render, Netlify, Vercel, Vite

Relevant Coursework: Programming in Python, DSA, DBMS, Probability, Business Analytics, REST APIs
